

Jeff Harrison

Project Management & Controls Professional

Jeff has over 35 years of experience across project controls, project management, business management and consulting. He has worked for client, contractor and consultancy organisations. His experience covers oil & gas and infrastructure projects. He has been involved with and led, business acquisitions and integration and had full business profit and loss accountability.

Jeff has undertaken Senior/Leadership roles in Project Controls & Project Management, and Business Leadership as Managing Director of Amec Business Consulting and Rider Hunt International

He is passionate about improving business and project performance through understanding business strategies and goals and developing appropriately aligned execution and risk management plans with empowered teams to deliver them.

Key career activities have included:

- Establishment of a consulting business within Amec including successful acquisition and integration of independent international consulting businesses of circa 500 personnel, achieving payback criteria/targets.
- Executive consultant to the Kazakhstan National Oil Company in dispute resolution and enhancing their role as partner/operator.
- Global Functional leadership of Project Controls within major contractor organisation.
- Leadership of business ISO 9001 implementation/accreditation
- Successful delivery of Projects/Developments as Project Manager for Client/Operator organisations including Arco/BP

Jeff is a qualified Mechanical Engineer who chose to follow a career path through Project Management & Project Controls rather than engineering.
